

## Prevention of Bedsores is the First Step

Prevention of bedsores is the first step. Being able to move a patient or love one by using air, instead of pushing and tugging, not only help the patient but also the caregiver.

Just imagine, turning a valve or moving a switch and then in a very short period of time, the patient or love one is moved over on their side. There is no pulling or tugging by the caregiver and the patient does not have to use energy to help.

Sheets are now easily changed without waiting on someone to help. The dirty sheet is just rolled up long ways to the patient's back. After the area is cleaned, the new clean sheet is just folded long ways and the folded edge is placed next to the rolled up dirty sheet. The top section of the clean sheet is then rolled up next to the dirty rolled up dirty sheet. After the patient is moved to his/her back then moved to the other side, the dirty sheet can be removed and after the area is cleaned the clean rolled up sheet can be unrolled and now the bed has a clean sheet with no strain on you or the patient.

Families now have a way to provide comfort to their love ones that are bed-ridden by purchasing a **Bedsore Free Device** and placing it on their bed or on the nursing home bed that they occupy. Even if the nursing home cannot or will not provide your love one with the device, you can and demand that they use it in a timely manner as a means to reduce or eliminate bedsores from occurring. Having a **Bedsore Free Device** on your love one's bed eliminates many reasons for not changing the sheets or cleaning the patient when needed. There is no longer an excuse for the one assigned to the room stating that they had to wait for help to do their job. Their help is on the bed.

So what are you waiting for?

Call or E-mail and reserve one for yourself today. The backlog of manufacturing of the **Bedsore Free Device** is getting longer as more people find out. You will be contacted when the size that you requested is available for you, then and only then will you need to provide payment, before it is shipped to you. The average wait for a **Bedsore Free Device** to be shipped to you runs from 1 to 8 weeks, depending on the demand when ordered.

The sooner you reserve one, the sooner you will be using the **Bedsore Free Device**.
